

## Solution / Support Developer – Basis Technologies International

Basis Technologies' development and support function is growing rapidly in support of our expanding product portfolio and customer base.

This is an excellent opportunity to join a company during an exciting growth phase and enjoy a fully supported career.

Our development teams are organized around product outcomes following the principles of Agile, Scrum and Kanban. Hence you can expect to work on a variety of projects, mostly dominated by new products or additions to existing products.

### Location:

This role is based in Dallas, Texas in the United States of America.

### The role:

The position will see you undertaking a day to day role to develop, test and support software around our certified SAP solutions suite. It will also involve remotely supporting product installations with customers.

All developers are expected to support their peers with code reviews and constructive feedback.

The role involves rotating shift work but with the flexibility for home working outside of core office hours.

### Key responsibilities:

- ▷ Design, develop, test and implement ABAP-based business process solutions for both existing and new products ▪
- ▷ Support existing customers and products. Covers support both within working hours and out of hours during evenings, nights and weekends on a rota basis ▪
- ▷ Attend daily stand-up progress meetings and backlog / requirements refinements meetings ▪
- ▷ Perform and document impact analyses and development estimates for change requests ▪
- ▷ Other duties may be assigned

## Essential Skills and Attributes:

- ▷ Strong interpersonal skills, quick-learning, attention to detail ▪
- ▷ Fluent written and spoken English ▪
- ▷ Excellent problem-solving and debugging skills ▪
- ▷ Strong SAP application development from basic ABAP through advanced technologies ▪
  - RFCs/BADIs/BAPIs ▪
  - ABAP OO ▪
  - Dialog programming
  - Report writing using ALV and ABAP lists ▪
  - User exits/enhancements ▪
- ▷ Must have solid SAP platform knowledge ▪
- ▷ SAP-centric software product lifecycles ▪
- ▷ Relational database design ▪
- ▷ Use of structured methodologies in software development lifecycle ▪
- ▷ Change management, transports and source code control ▪
- ▷ Must demonstrate high enthusiasm and good business aptitude ▪
- ▷ Must have ability to effectively articulate a solution

## Desirable Skills and Attributes:

- ▷ SAP HANA knowledge ▪
- ▷ SAP BASIS knowledge ▪
- ▷ SAP Web UI development experience (BSP, WebDynpro) ▪
- ▷ ABAP Unit ▪
- ▷ TDD

## Education and Training

- Degree in Computing related subject or equivalent
